SUMMARY

Resourceful Full-Stack Software Engineer with 3 years of hands-on experience building scalable, user-focused web applications using Django, Python, JavaScript, Tailwind CSS, HTML, and modern frontend frameworks like Next.js. Skilled in transforming product requirements and Figma designs into clean, responsive, and high-performance interfaces. Experienced in backend development including RESTful APIs, authentication systems, payment integration (Paystack), geolocation data handling, and real-time features using Django Channels. With a strong track record of delivering end-to-end solutions such as e-commerce platforms, delivery/dispatch systems, event booking systems, visitor management UIs, and location-based services. Known for writing maintainable code, collaborating closely with backend teams, and integrating APIs efficiently into frontend workflows. Passionate about building reliable digital experiences that balance functionality, performance, and great design.

PROFESSIONAL EXPERIENCE

Xeta Digital ng | **April – Present**

- Led the end-to-end product development process for multiple web applications, from requirements gathering to deployment.
- Created detailed wireframes, user flows, and high-fidelity Figma mockups to translate business needs into clear, actionable design specifications.
- Collaborated closely with developers to define product features, prioritize tasks, and ensure timely delivery.
- Developed responsive, user-friendly frontend interfaces using HTML, Tailwind CSS, JavaScript, and integrated REST APIs for dynamic functionality.
- Conducted thorough functional, usability, and regression testing to ensure product quality, identify bugs, and verify feature implementations before release.
- Ensured alignment between design expectations and engineering output by maintaining accurate documentation, versioned prototypes, and design assets.
- Played a key role in delivering polished digital solutions that met client goals, improved user experience, and followed modern UI/UX best practices.

Freelance
News webapp | [Newstrends](#)
(Django, HTML/Tailwind, JavaScript)
Freelance | Remote

- Designed and developed a full featured newspaper web application using Django, implementing models, views, and templates for articles, categories, authors, and user interactions.
- Built a secure authentication system enabling users to register, log in, manage profiles, and interact with published content.
- Implemented admin dashboards for editors to create, edit, schedule, and publish news articles efficiently.

- Developed a responsive UI using Tailwind CSS and JavaScript, ensuring a clean and modern reading experience across desktop and mobile.
- Integrated search and filtering features, allowing users to find articles by category, tags, and publication date.

Logistics website
(Django, JavaScript, Tailwind CSS, APIs, Real-time Tracking)
Freelance | Remote
- Developed a logistics web application that enables users and dispatch riders to create, track, and monitor package deliveries from pickup to drop-off.
- Designed and implemented backend logic in Django, including models for shipments, users, drivers, delivery status, and tracking events but focused strongly on the UI design.
- Integrated location-based features using APIs, enabling **geolocation tracking**, distance estimation, and mapping.
- Developed a clean, responsive frontend using Tailwind CSS and JavaScript, ensuring smooth user workflows for booking deliveries and following status updates.
- Implemented secure user authentication and role-based access for customers, dispatch riders, and admin staff.
- Built an admin dashboard for monitoring trips, assigning drivers, and handling delivery exceptions.
- Optimized database queries and API endpoints to improve system performance and ensure reliability during high traffic.
- Delivered well-organized documentation and clean, scalable code for long-term maintainability.

Personal Portfolio project
Diary & Digital Library Web Application | Pinknote
(Django, Tailwind CSS, JavaScript, SQLite/PostgreSQL)
Independent Project
- Designed and developed a combined personal diary and digital library application, allowing users to write, organize, and store diary entries securely.
- Built backend features in Django, including models for diary entries, categories, books, notes, and user profiles.
- Implemented a secure authentication system, ensuring users can create private accounts and manage their personal content safely.
- Developed a rich-text diary editor with support for formatting, tagging, and organizing entries by date or category.
- Created a digital library module where users can upload, view, and manage documents, ebooks, and reading materials.
- Designed a clean, responsive interface using Tailwind CSS, focusing on readability, minimalism, and smooth navigation between diary and library views.
- Added search and filtering capabilities to make it easy for users to find past entries, books, and files.

- Wrote clean, scalable code and structured the project for future expansion into mobile or multi-user versions

EDUCATION

Bsc Biochemistry
University of Cross River State

CERTIFICATIONS

- ALX SWE certificate
- Internpulse – Frontend Internship certification
- Women techsters bootcamp (frontend stack)

TECHNICAL SKILLS
Backend Development: Django, Django REST Framework, Python, Django Channels (real-time tracking), SQLite, PostgreSQL
Frontend Development: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), Fetch API, AJAX, Responsive UI Development
Fullstack & System Architecture: API Integration, Authentication & Authorization, CRUD Systems, Admin Dashboards, Real-Time Notifications, WebSockets, Deployment (Render, Vercel, Heroku)
Tools & Product Skills: Git & GitHub, Postman, Figma (wireframing & mockups), Product Planning, Requirements Gathering, Software Testing (manual UI testing), Jira / Trello / Notion
Cloud & DevOps (Basic Knowledge): Docker (beginner), CI/CD concepts, Environment Variables, Virtual Environments (Poetry, venv)
Design & UI/UX: Figma (wireframes & prototypes), Canva
Additional Capabilities:
Project Scoping, Documentation Writing, User Flow Design, Collaboration with cross-functional teams, Product Management for web projects
